

FILE BLUE APEA

Blue Apes

From the title piece, "Blue Apes" - a story of discovery, loss and betrayal on a distant planet - to "Sunday's Child" - an account of an alien born to human colonists - Phyllis Gotlieb's short fiction explores issues and passions that are deeply human, even when her characters are not. Gotlieb writes in the American SF tradition from a decidedly Canadian perspective.

The Science Fiction of Phyllis Gotlieb

Gotlieb is a writer central to the Canadian science fiction canon. Though she has been called the queen of Canadian SF by Robert J. Sawyer, and though David Ketterer has suggested that she is Canadian SF, Gotlieb has been largely overlooked by SF studies. This book delves deeply into her body of work and traces her career in detail. Offering close readings of Gotlieb's novels, short stories (including ones not reprinted since their initial appearances), and SF-related poetry, this study explores Gotlieb's development as a writer and her characteristic themes. The book also references her manuscripts when the differences between them and the published stories provide insights into her working methods. The book enumerates and analyzes Gotlieb's innovative explorations of common SF tropes such as the superhuman, human-alien interaction, and the galactic empire, her prevalent thematic concerns (e.g., reproduction, colonization, the mind-body relationship, the essence of "humanity") as well as her stylistically dense and literary approach to the genre.

War for the Planet of the Apes

David F. Walker (Tarzan on the Planet of the Apes) and illustrated by Jonas Scharf (Warlords of Appalachia) present an original story set between 20th Century Fox's films, 2014's Dawn of the Planet of the Apes and the War for the Planet of the Apes film. As Caesar and his apes recoup and recover after the Koba-led attack on the human compound in San Francisco, the military begins moving in, setting the stage for the momentous war to come. Even as humans and apes come to violent conflict, the virus that wrecked the world has begun to evolve... Collects the complete limited series.

Canadian Books in Print. Author and Title Index

Perhaps a young witch doctor is the least likely hero to save civilization. But, when a thief disturbs an ancient tribal burial ground, the young shaman must give chase into the heart of New York City. Armed only with his closest friends, a curmudgeonly chameleon and a few sparks of ancient magic, Togo is forced from the comfort of his youth and into adulthood, landing on page six in the process.

Shaman of New York

" ... Documents the history and development of [Post-colonial literatures in English, together with English and American literature] and includes original research relating to the literatures of some 50 countries and territories. In more than 1,600 entries written by more than 600 internationally recognized scholars, it explores the effect of the colonial and post-colonial experience on literatures in English worldwide.

Encyclopedia of Post-Colonial Literatures in English

Profiles the life of the scientist who studied mountain gorillas in central Africa and worked to ensure their survival.

Dian Fossey

Myles Standish Cabot, radio genius, who solved the secret of the wireless transmission of matter, returns to earth from Poros - the planet Venus - whose inhabitants, the Cupians, are much like men, except that they have antennae, instead of ears, and communicate by radio. Cabot relates how the conquered Formians (see "The Radio Man"), giant, intelligent ant-men, conspired with Prince Yuri, a renegade Cupian, and his followers to again take control of the planet.

Government Employee Relations Report

The mighty silverback gazed through his heavy brow with intelligent eyes. Lips tightly closed with an uncompromising pout. He just looked and breathed purposefully. It seemed clear to both that neither of them could make any further move without showing weakness, stalemate. Oakwood looked on, the King looked back... Follow Dr. Oakwood's team for fifteen years as they help to save a species. Which in turn creates something that none of them could ever have dreamed of...

The Blue Wound

Driven from their woodland home, Caesar and his apes are still recovering from the takeover by renegade ape Koba. Caesar is desperate to avoid war with the humans, but this is a faint hope, as his enemies are about to receive military reinforcements headed by the ruthless Colonel McCullough. While trying to hold off McCullough's soldiers, Caesar sends his son Blue Eyes on a mission to the south to try to find a safe haven for the apes, despite rumors of terrible things happening there. Meanwhile supporters of Koba's revolt are spreading dissent among Caesar's rank.

Design, Construction, Modification, Maintenance and Decommissioning of Filling Stations

The official novelization the blockbuster film from 20th Century Fox DAWN OF THE PLANET OF THE APES Led by Cesar, a growing nation of genetically evolved apes has spent ten years building a home for itself. But as they have settled into a peaceful way of life, mankind has been devastated by a terrible virus triggered when the apes escaped. Neither group knows that the other has survived—until a violent encounter between the apes and a band of human survivors. Quickly they reach a fragile peace, but it proves short-lived as both sides are brought to the brink of war. A war that will determine who will emerge as Earth's dominant species.

Department of the Interior and Related Agencies Appropriations for 1989: Testimony of public witnesses for resource management programs

Edgar Rice Burroughs's jungle tale has captivated readers for generations. The Short Tales Classic brings the man-child's adoption by the apes to life for even the youngest audience. Blue level for transitional readers.

The Radio Beasts

Many of the papers in this volume were first presented at the Third International Great Apes of the World Conference, held July 3-6, 1998 in Kuching, Sarawak, Malaysia. The editors of this volume, the first in a two-volume series, are world renowned, having dedicated most of their lives to the study of great apes. The world's premiere primatologists, ethologists, and anthropologists present the most recent research on both

captive and free-ranging African great apes. These scientists, through deep personal commitment and sacrifice, have expanded their knowledge of chimpanzees, bonobos, and gorillas. With forests disappearing, many of these studies will never be duplicated. This volume, and all in the Developments in Primatology book series, aim to broaden and deepen the understanding of this valuable cause.

Blue

This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1976.

War for the Planet of the Apes: Revelations

The author wishes to make it very clear that this book has nothing to do with Star Trek. Recent review: 5 stars "A fascinating combination of science and politics this is a thrilling read." - wondrous science fiction for the thinking person! FEDERATION takes close encounters to a whole new level. An oft-used and laughed about sentence is when an alien arrives and asks, "Take me to your leader!" What if this really happened? Who is the leader? There is no world leader - only many individuals who would like to be. Federation takes the answer seriously and so begins a trilogy which has compared with Foundation with aliens. A galactic empire of a quarter of a million worlds stumbles across the Earth. With elements of a political thriller, there is an intriguing storyline which addresses the environmental and myriad social problems faced by the world today. The aliens' philosophy on life is totally unexpected. With the help of intelligent automatons, they've turned what many on Earth believe to be a reviled political system into a utopia for the masses, but are they a force for good or evil, and will the wealthy make the compromises needed for a successful outcome? A Daragnen university professor, Yol Rummy Blin Breganin, discovers that Earth failed in its attempt to join the Federation, and, for some unknown reason, members are forever banned from visiting or contacting the planet. Rummy had never heard of a whole world being outlawed. Perhaps it would be sensible to leave well enough alone but no, he decides to investigate... FEDERATION is the first in a trilogy of near-future, hard science-fiction novels by Tony Harmsworth, the First Contact specialist. Submerge yourself in humankind's cultural and economic dilemma. Get FEDERATION today.

Dawn of the Planet of the Apes - The Official Movie Novelization

THREE BOOKS FOR THE PRICE OF TWO (816 pages) FEDERATION Complete Trilogy - is controversial, political, near-future science fiction for the reader who enjoys using their own imagination to think about how the world might react to real alien contact from vastly advanced civilisations. When the first volume was released, it became the subject of vitriolic hatred by readers of a particular political persuasion who seemed incapable of understanding that they were reading a speculative and imaginative story. Instead, they believed the stories were actually a political treatise, and wrote angry reviews which clearly showed that they failed to grasp the difference between fiction and fact. They were patently incapable of working out what would happen to our economic system when automatons became capable of carrying out all work, faster, more efficiently, more cheaply and more accurately than humankind. With the exception of the billionaire cybernetic business owners, everyone else had to starve, or exist on government or charitable handouts. The author suggests that anyone unable to understand this simple fact of life finds something else to read. The Galactic Federation had, during hundreds of thousands of years, managed to overcome all of the problems and sentient beings lived in utopia. They did not achieve that without facing the same violent and corrupt power struggles which come to Earth in this trilogy. Federation (book 1) speculates what would happen when an ambassador from a peaceful alien Federation asks to be taken to our leader. Who would that be? There is no world leader. The ramifications of the request lead to fudged responses. They, in turn, result in civil unrest and shocking violent events on Earth, as the problems which would inevitably be created by cheap and efficient automatons are applied to our political and economic structures. As a result of events in

book 1, Federation and Earth (book 2) finds the Earth banned from all space exploration. A dictatorial US president, backed by the military, shuts the USA off from the rest of the world. A new UN secretary general tries to mediate, while a group called FREE AMERICA, begin to challenge the oppressive administration. Will the Federation be no more than interested observers or might they break their own rules and offer a helping hand? Hidden Federation (book 3) begins with an interim solution. With the exception of United States of America, who will follow a free and independent path, the rest of the world joins the Galactic Federation. More problems arise as California declares UDI and the American crisis deepens. Meanwhile, the million year history of the alien civilisations is revealed, and readers discover how they dealt with the very same problems which applied to the newly fragmented Earth. Although set in today's world, this trilogy provides a fascinating insight into one possible future for the Earth, once automatons become ubiquitous and sentient. Free thinking, open-minded readers have loved the individual books. This eight hundred page combined volume offers all three volumes for the price of two. Buy it today.

Tarzan of the Apes Tale #1 The Man-Child

Wavelet-based procedures are key in many areas of statistics, applied mathematics, engineering, and science. This book presents wavelets in functional data analysis, offering a glimpse of problems in which they can be applied, including tumor analysis, functional magnetic resonance and meteorological data. Starting with the Haar wavelet, the authors explore myriad families of wavelets and how they can be used. High-dimensional data visualization (using Andrews' plots), wavelet shrinkage (a simple, yet powerful, procedure for nonparametric models) and a selection of estimation and testing techniques (including a discussion on Stein's Paradox) make this a highly valuable resource for graduate students and experienced researchers alike.

All Apes Great and Small

Audacious and genre-defying, *Black and Blue* is steeped in melancholy, in the feeling of being blue, or, rather, black and blue, with all the literality of bruised flesh. Roland Barthes and Marcel Proust are inspirations for and subjects of Carol Mavor's exquisite, image-filled rumination on efforts to capture fleeting moments and to comprehend the incomprehensible. At the book's heart are one book and three films—Roland Barthes's *Camera Lucida*, Chris Marker's *La Jetée* and *Sans soleil*, and Marguerite Duras's and Alain Resnais's *Hiroshima mon amour*—postwar French works that register disturbing truths about loss and regret, and violence and history, through aesthetic refinement. Personal recollections punctuate Mavor's dazzling interpretations of these and many other works of art and criticism. Childhood memories become Proust's "small-scale contrivances," tiny sensations that open onto panoramas. Mavor's mother lost her memory to Alzheimer's, and *Black and Blue* is framed by the author's memories of her mother and effort to understand what it means to not be recognized by one to whom you were once so known.

The Civilization of Ancient Crete

DigiCat Publishing presents to you this special edition of "The Radio Beasts" by Roger Sherman Hoar. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Federation

In the early decades of the twentieth century, almost everyone in modern theater, literature, or film knew of Otto Kahn (1867-1934), and those who read the financial press or followed the news from Wall Street could scarcely have missed his name. A partner at one of America's premier private banks, he played a leading role in reorganizing the U.S. railroad system and supporting the Allied war effort in World War I. The German-Jewish Kahn was also perhaps the most influential patron of the arts the nation has ever seen: he helped

finance the Metropolitan Opera, brought the Ballets Russes to America, and bankrolled such promising young talent as poet Hart Crane, the Provincetown Players, and the editors of the Little Review. This book is the full-scale biography Kahn has long deserved. Theresa Collins chronicles Kahn's life and times and reveals his singular place at the intersection of capitalism and modernity. Drawing on research in private correspondence, congressional testimony, and other sources, she paints a fascinating portrait of the figure whose seemingly incongruous identities as benefactor and banker inspired the New York Times to dub him the "Man of Velvet and Steel."

Federation Complete Trilogy

In an imaginary lagoon near the island of Kapupu in the South Pacific lives a group of nutty but sophisticated underwater creatures, complete with neuroses that rival those of humans (also known as "hairless beach apes"). Somehow their wet world is oddly yet hilariously similar to our own. Sherman, a great white shark, is a typical guy (well, except for that pesky dorsal fin), and Megan is his ruthless but nurturing wife. Rounding out the aquatic crew are Fillmore the turtle, geeky fish Ernest, and macho hermit crab Hawthorne. Salty old Captain Quigley, who lost his leg to Sherman years ago, is determined to exact his revenge. Sherman and friends effectively reflect human behavior and occasionally must confront humans' encroachment on their unspoiled habitat. Environmental groups have applauded this comic strip with a social conscience for promoting marine conservation. Sherman's Lagoon has been syndicated since 1991, currently by King Features, and has a circulation of more than 200 daily newspapers on five continents.

Construction Reports

A nuclear war, the war of all wars, desolated Earth the way we once knew it. The few lone people that had survived the catastrophic event sought out refuge at the bottom of canyons to avoid the toxicity and radiation above. Every day, many prayed for some sort of sign, some ray of hope that would come save them from their dire situation. Food was scarce and staying alive was even tougher. Help would come from unexpected sources. Nobody ever truly believes in extraterrestrials until they're standing right in front of you. And even then, it is not totally believable. A misfit group of people that survived the war, are kidnapped to help a much larger universal cause. One that none of them ever knew existed. A few of the surviving earthlings are carefully selected due to each one of the skills that they possessed prior to the big war. An ex-navy seal, a former showgirl, a doctor, an escaped prison inmate, a former Olympic champion, and a biker gang member, despite their differences, are forced to come together quickly as they are abducted one by one and thrust into a world of unknown. They come to meet an alien general, short in stature and skin the color of night, who is the leader of a galactic army assembled of beings from many different planets. It doesn't take long to realize the mysterious general is full of deceit, espionage, and lies ... It's difficult for them to know whether to trust the small alien since he treats them well initially or to flee and figure things out for themselves. They travel to many different planets to gather information and skillsets that they will need to defeat a much larger threat than they had originally thought that looms in their future. Will the humans be able to come together in these foreign predicaments, or will adversity and the weight of these unique situations destroy them? Only time will tell...

Wavelets in Functional Data Analysis

When it comes to love, it's not only humans who like to plan a romantic proposal. Meet a penguin on the hunt for a pretty pebble to impress his partner, a flurry of flamingos turning a lake into a matchmaking dance floor and even pair of sweetly serenading gibbons! Travel from the deepest depths of the ocean to tropical rainforests and beyond, discovering the weird and wonderful wooing techniques of animals in love. This picture book is the perfect present to say I love you to a child.

Black and Blue

This gorgeous collection of animal poems from Roger Stevens, Liz Brownlee and Sue Hardy-Dawson will entrance and delight in equal measure. Featuring a full alphabet of animals, birds, and insects, with the odd extinct or imaginary creature thrown in, these beautiful shape poems are a perfect way to introduce children to poetry. Some funny, some serious, there is something here for everyone. Book band: Dark Blue

Otto Kahn

Gerald K. Stone has collected books about Canadian Jewry since the early 1980s. This volume is a descriptive catalog of his Judaica collection, comprising nearly 6,000 paper or electronic documentary resources in English, French, Yiddish, and Hebrew. Logically organized, indexed, and selectively annotated, the catalog is broad in scope, covering Jewish Canadian history, biography, religion, literature, the Holocaust, antisemitism, Israel and the Middle East, and more. An introduction by Richard Menkis discusses the significance of the Catalog and collecting for the study of the Jewish experience in Canada. An informative bibliographical resource, this book will be of interest to scholars and students of Canadian and North American Jewish studies.

Planet of the Hairless Beach Apes

The second volume within this series presents more than fifty series characters within pulp fiction, selected to represent four popular story types from the 1907-1939 pulps--scientific detectives, occult and psychic investigators, jungle men, and adventurers in interplanetary romance. Some characters--Tarzan, John Carter of Mars, Craig Kennedy, Anthony (Buck) Rogers--became internationally known. Others are now almost forgotten, except by collectors and specialists.

Star Crew

A CONSPIRACY in SCIENCE in PROGRESS You are going to read about how science applies a system of mind control and thought processing. Every conspiracy that Science ever thought up such as the Critical Density Conspiracy or the Dark Energy Conspiracy, or any conspiracy connected to science is in place to protect this theory that those teaching science hides from anyone outside physics from becoming known. The Mother Conspiracy is in place so that students in physics are brainwashed by instigating the deliberate sanctioning of mind control on students through their practising of enforcing thought control they unleash on students. I prove that the Mother Conspiracy is in place. I reveal the Mother Conspiracy and I show why it is in place. I show how every student including you reading this has been brainwashed to believe science is true and to believe in science. I prove the Universe is formed as singularity and contains only singularity in many forms thereof.
