UAS Pilot Log Expanded Edition

The UAS Pilot Log Expanded Edition takes your flight recording experience to the next level. Building on the success of droneprep's standard pilot log, this Expanded Edition incorporates pilot feedback and testing results to maximize the routine operations for pilots and operators of unmanned aircraft systems and drones. This log book captures all the elements contained in droneprep's standard log book but offers additional and expanded tools to enhance your flying and record keeping experience. Using this logbook, pilots will be able to distill complex procedures and note taking with simple, easy-to-understand entry pages that can be maintained by any drone operator, regardless of skill level or experience. Added spacing, graphs, notational areas, and commentary fields make this Expanded Edition a flexible and powerful record that will serve as both a tool to enhance the flight experience and a superb record of exactly what happened on the day of each flight. The UAS Pilot Log, Expanded Edition, is one of the first flight logs uniquely designed for the needs of drone operators. After extensive research into record keeping and processes maintained by expert operators, droneprep designed this log book system specifically for pilots and operators of unmanned aircraft systems and drones to plan and track critical flight details. As FAA and other government regulations evolve, the UAS Pilot Log will help keep you on top of your record keeping activities. Seamlessly designed to be useful and relevant, this logbook distills complex procedures and processes with simple, easy-to-understand entry pages that can be maintained by any drone operator, regardless of skill level or experience. The result is a flexible yet powerful record that will serve as both a tool to enhance your flying experience and a superb record of exactly what happened on the day of your flight.

UAS Pilot Log

Do you own a drone? Then you need a log book. Log each flight confidently and increase your safety, as well as the value of your drone. This log book is the official standard and includes details that are specific to drone operations. The logbook has 120 pages and measures 8 inches by 10 inches for convenient carry and adequate size. Each page has space for 3 logged flights. You have space for 360 drone flights and dedicated

spots for each flight date location drone number (registration number) drone type aircraft performance characteristics aircraft's lost link procedures ...and more! Why do you need a drone log book? Marketing. Showing a completed logbook to a potential customer is a great marketing point. Like the old adage, "A picture is worth a thousand words," a good logbook is worth a thousand flights. You can quickly demonstrate your flight experience by flipping through the pages. Furthermore, a well-kept and orderly logbook gives the impression that you are a professional. The FAA or Law Enforcement Can Request Your Logbook. If you are a commercial operator flying under Part 91 & Part 61 (like with a Section 333 exemption), 14 C.F.R. § 61.51(i) says, "Persons must present their pilot certificate, medical certificate, logbook, or any other record required by this part for inspection upon a reasonable request by" the FAA, an authorized representative from the National Transportation Safety Board, or any Federal, State, or local law enforcement officer. If your electronic logbook is on your device, do you really want to give law enforcement or the FAA your device? Furthermore, how are you to get the data off that device? Insurance. When you apply for insurance, they will ask you to fill out a form that is going to ask for all sorts of information. A logbook will assist you in filling out the form so you can receive the most accurate quote. Required in Other Countries. Other countries such as South Africa require the drone logbook to be in paper. Paper is the current industry standard. Less Cumbersome. If you are marketing to a potential client, you can scan pages of your logbook and send it to them. It is more cumbersome to get the data off a phone or website. Very Little Problems. What happens if your phone is stolen, water damaged, battery dies, or there is poor cell phone signal? Paper does not need a cell signal or batteries. No Data Theft. You don't have to worry about data theft like you would with a website or an app. Fidelity. Electronic logbooks can be changed while pen and paper are permanent. Buy now for yourself or a friend and be confident in your drone's flight log.

The Standard UAS Operator Log

The Standard UAS Operator Log provides record-keeping for flight operations of small and large unmanned aircraft systems (UAS) or unmanned aerial vehicles (UAV), remote-control aircraft (R/C), remotely piloted aircraft (RPA), and drones. It meets the needs of civilian, military, hobbyists, and professional operators alike so that critical flight details can be tracked. The logbook has sufficient room for more than 300 flights with space to record the equipment details, location, aircraft category, flight conditions, type of operating time, number of takeoff/launch and landing/recovery, and the total duration of the flight. The remarks area provides space to note the mission, crew, control method (such as RC, first person view or RPV and autonomous), battery number and configuration or other information to correlate to the flight controller mission logs. It also includes a summary page for owner/operator (such as contact details, certificates and ratings, and recurrency training), a briefing/academic instruction log, a page for equipment and hours flown, and initial and recurrent training endorsements.
