## Language and Literacy Connections

Language and Literacy Connections: Intervention for School-Age Children and Adolescents takes readers on a path of knowledge steeped in principles and practical applications. This much-needed new text uniquely integrates language learning and disorders and literacy together in a coherent and cohesive narrative that covers the challenges facing school-age students from early elementary levels through high school. Using past and current research and interventions from speech-language pathology (SLP) and reading and literacy arenas, the authors present transcripts, cases, and detailed intervention sessions to provide a template for daily practice. The text raises questions relating to “why am I doing this?” and provides some answers to this most complex, yet basic, question. Language and Literacy Connections... \* Uses strong theoretical foundations with detailed applications to real-life situations and practices \* Highlights the different levels of literacy, from foundational to disciplinary, that underpin current thinking \* Includes three major sections that build upon one another as the authors navigate through: (1) conceptual frameworks, (2) practical applications across discourse intervention and individual language components, and (3) service delivery models \* Addresses the role of comprehension in auditory processing and classroom difficulties \* Compares effective and less effective intervention sessions with explanations about why each fall within a category \* Debunks common myths and practices that have been questionable for decades but that persist in practice \* Offers innovative suggestions related to providing collaborative service delivery procedures through virtual online platforms and specific lesson plans \* Answers the question asked by many school-based SLPs: How do I add literacy on top of my responsibilities when my caseloads are so large and demanding? Key Features: \*

Questions at the beginning of each chapter that reflect concerns of SLPs and their teams \* Projects and assignments that supplement and review the material \* Examples of teaching modules with practical lesson plans that integrate the role of SLPs in Interprofessional Practices (IPP) while explicitly addressing the curriculum across a variety of subject areas Disclaimer: Please note that ancillary content (such as documents, audio, and video, etc.) may not be included as published in the original print version of this book.

## **Metonymy and Language**

Metonymy and Language presents a new theory of language and communication in which the central focus is on the concept of metonymy, the recognition of partial matches and overlaps. Through the use of original data sets and rigorous primary research, Denroche characterizes metonymy as key to understanding why language is so 'fit for purpose' and how it achieves such great subtlety and flexibility. This study develops the notion of 'metonymic competence' and demonstrates that metonymic behavior is often pursued for its own sake in recreational activities, such as quizzes, puzzles and play, and shows the possible impact of the application of metonymic processing theory to professional fields, such as language teaching and translator training. Furthermore, it proposes a research approach with metonymy at its center, 'metonymics,' which Denroche suggests could provide a powerful framework for addressing issues in numerous fields of practice in the arts and sciences.

Drawing on the latest research on development among toddlers and preschoolers, *At a Loss for Words* lays out the importance of getting parents, policy makers, and child care providers to recognize the role of early literacy skills in reducing the achievement gap that begins before three years of age. Readers are guided through home and classroom settings that promote language, contrasting them with the "merely mediocre" child care settings in which more and more young children spend increasing amounts of time. Too many of our young children are not receiving the level of input and practice that will enable them to acquire language skills—the key to success in school and life. Bardige explains how to build better community support systems for children, and better public education, in order to ensure that toddlers learn the power of language from their families and teachers.

## **At A Loss For Words**

Literature explores the human condition, the mystery of the world, life and death, as well as our relations with others, and our desires and dreams. It differs from science in its aims and methods, but Babuts shows in other respects that literature has much common ground with science. Both aim for an authentic version of truth. To this end, literature employs metaphors, and it does so in a manner similar to that of scientific inquiry. The cognitive view does not imply that there is a one-to-one correlation between the world and text, that meaning belongs to the author, or that literature is equivalent to perception. What it does maintain is that meaning is crucially dependent on mnemonic initiatives and that without memory, the world remains meaningless. Nicolae Babuts claims that at the interface with the printed page, readers process texts in a manner similar to the way they explain the visible world: in segments or units of meaning or dynamic patterns. Babuts argues that humans achieve recognition by integrating stimulus sequences with corresponding patterns that recognize and interpret each segment of a text. Memory produces meaning from these patterns. In harmony with its goals, memory may adopt specific strategies to deal with different stimuli. Dynamic patterns link the unit of processing with the unit of meaning. In sum, Babuts proposes that meaning is achieved through metaphors and narrative, and that both are ways to reach cognitive goals. This original study offers perspectives that will interest cognitive psychologists, as well as those simply interested in the process through which literature stirs the human imagination.
